

5-SEC WORKSITE TENT TED Equipement® BY TRIGANO

The TED 5-sec worksite tent by Trigano is the result of a successful partnership between Telenco distribution and Trigano. For the design of this worksite tent the two companies have combined their 40-year know-how in the manufacture of camping tents with the fine knowledge of telecom network installation and maintenance realities.

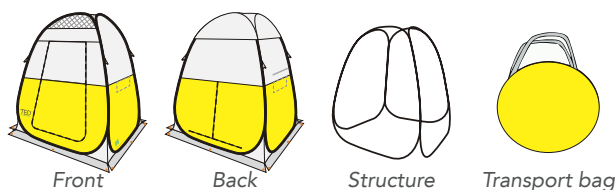

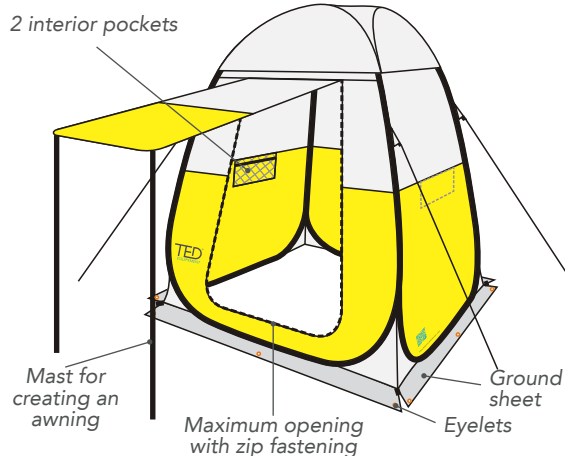

To offer telecom technicians an innovative and practical tent that meet their exact needs, we have considered all the relevant details for building a high-quality, high-visibility and extremely resistant through time product. Thus, materials used for the manufacture of the TED Equipement® 5-sec worksite tent have been tested with the utmost care to guarantee you serenity, simple installation and durability.

This worksite tent will protect you and your equipment against bad weather working conditions, whether you are intervening in trenches, manholes or on public roads.

The white polyester canvas fabric offers a natural lighting for an accurate color rendering and visual fatigue-free working conditions. That is extremely important when it comes to distinguish color codes for fiber optic installation.

Robust and stable thanks to its fiberglass hoops and its plastic feet, this tent also offers an easy maintenance: the polyester canvas can be cleaned by simply using a pressure washer.

PN	DIMENSIONS	Weight
12129	190 x 190 x 200 cm	6,53 kg

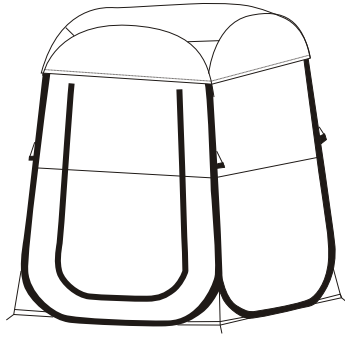

✓ FEATURES

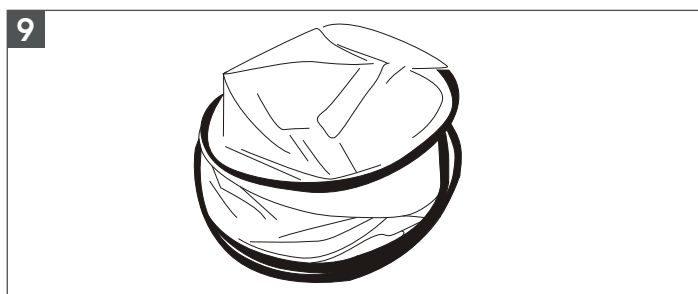

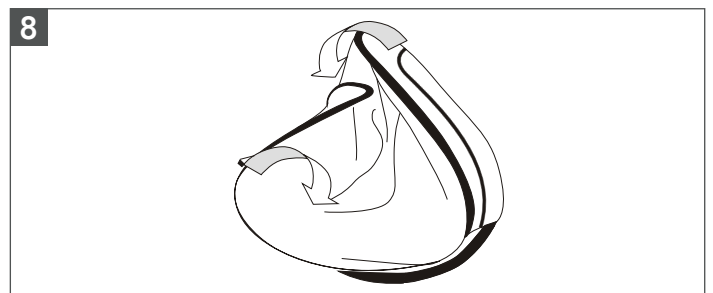

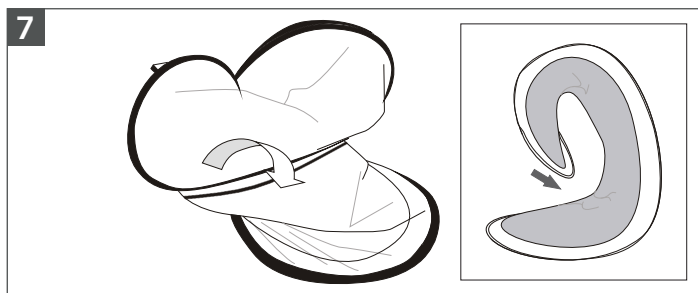

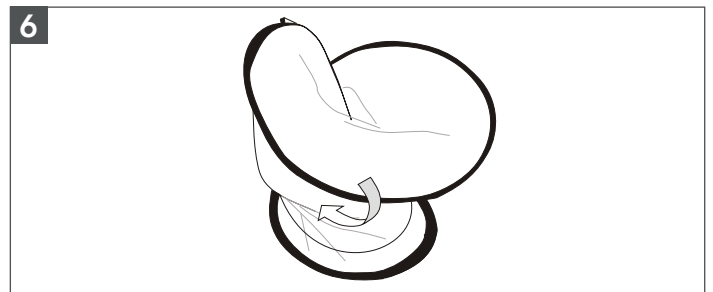

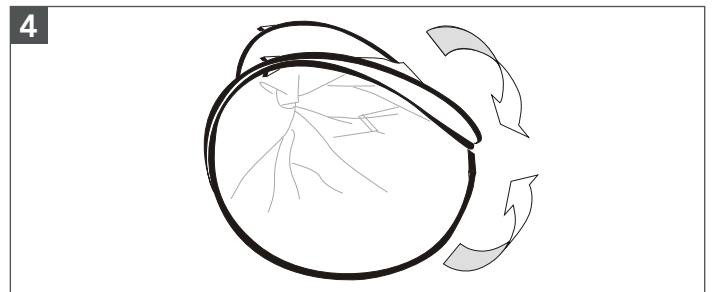

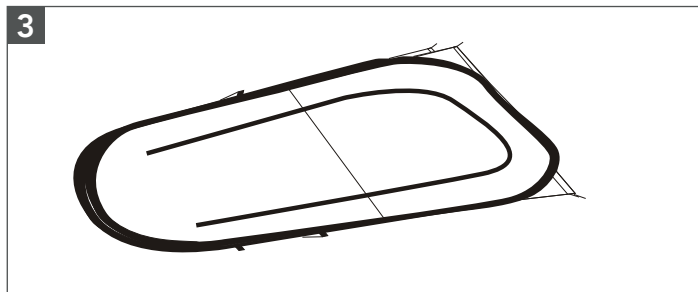

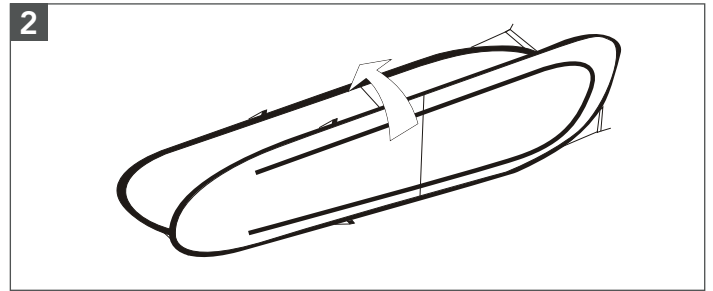

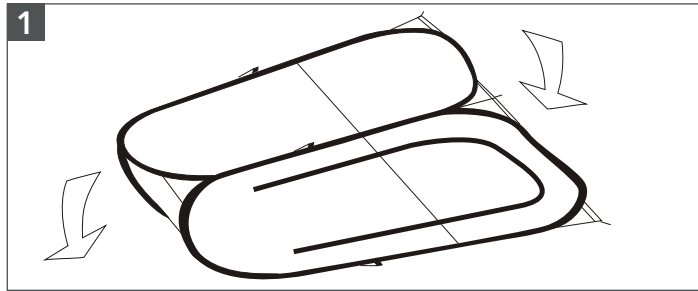

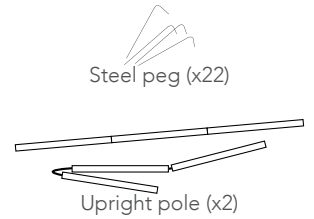

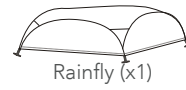

- Structure: 4 fiberglass upright poles Ø 5mm
- Highly protective rainfly
- Vent (upper side of the tent)
- 6 stay ropes
- 22 steel pegs
- 2 steel masts (for awning)
- 2 interior storage pockets
- Roof, walls and double roof top: PU coated Oxford polyester
- Dimensions of the bag: Ø 78 x 7 cm

+ THE PRODUCT'S BENEFITS

- Pop-up opening system thanks to its interior fiberglass poles which enable a record-breaking time installation. For starting to enjoy the benefits of this worksite tent without further delay.
- Access at the front side via a wide opening with zip fastening
- Made of Oxford polyester fabric (210D PU waterproof 3000 mm) white/yellow that ensures a natural lightening
- The 25 mm wide retro-reflective strips that separate the white fabric from the yellow one all around the tent offer it a better visibility/protection
- Steel pegs ensure an additional fixing in case of bad weather (wind, heavy rain etc.)
- Two steel masts offer the possibility to create an awning

TENT CARE AND MAINTENANCE

In case your tent is wet after exposing it to bad weather conditions, we recommend you to take the time to dry it before prolonged storage. To be stored in a dry and ventilated room.
